
How To Play Online Slots

Written by Matt Kennedy | Last updated: 3 September 2015

Slots are ridiculously popular. They're played all over the world in both traditional and **online casinos**. They've gone from being machines with a lever you pull, to high-quality games you can play on your mobile while on the go. One of the reasons why **slots** are so popular is because they're good fun, they provide hours and hours of entertainment and they're easy to play. This is a brief guide to slots for newbies; if you've never played slots before, don't worry you'll soon get the hang of them.

Reels And Paylines

There are two things about slots newbies should understand: reels and active paylines. Reels are simply the number of different symbols displayed horizontally. A three-reel slot will have three symbols in a horizontal row, for example. You'll find that most slots, whether classic or online, have three reels, while video slots tend to have five. A growing number of online slots offer different variations of the three-reel model, with many offering higher numbers of reels. Active paylines are rows of horizontal symbols that can qualify for a win. If you're playing a three-reel slot, you'll need three winning symbols to win. If you get three winning symbols in an active payline, you'll win. If you get three winning symbols, but they're not in an active payline, you won't win. Classic slots tend to have between one and five active paylines. Video slots usually have up to 50. As for **mobile slots**, they can have well over 100! It's important to take note of the paylines because they can affect how much you can bet, and therefore how much you can win when playing slots. You'll find that slots that have more reels tend to have more active paylines. Generally speaking, if the slot you're playing has three reels, you'll need to get three winning symbols on the same active payline in order to win. Most slots that have more than three reels still let you win if you get just three winning symbols. In other words, it's better to play slots that have more reels because you can get more winning symbols, which increases your chances of winning.

Progressive Jackpots

The main reason that slots are so popular is because of the progressive jackpots you can play. These **jackpots** can offer huge cash prizes, though always remember that the chance of actually winning one of these is remarkably slim. Still, it's good to have a go once in a while. The progressive jackpots found at online slots are added to every time someone places a bet; they can be added to from all across the world. The jackpot just keeps on getting bigger and bigger! If a particular slot is popular and it offers a good pay-out rate, it's bound to be a hit with customers and in turn, it's bound to build up quite a hefty progressive

jackpot. Loads of sites offer dozens, even over a hundred slots games. Slots come in all sorts of themes – at some online casinos you’ll even find slots themed after the latest big movie releases!

Responsible Gambling: Gambling should be fun and never seen as a way to make money. Only gamble with money you can afford to lose. If you feel you may have a problem, visit gambleaware.org or call the National Gambling Helpline on 0808 8020 133. All sites featured on Top Online Bingo Sites are licensed by the UK Gambling Commission. You must be 18+ to gamble.
